

Position – Data Engineer

Experience Required: 3+years

Working Days: 5 Days a week

Shift Timings: 12:00 hrs. - 21:00 hrs. IST

Who we are:

Our purpose is to help more people to look after their future. Always striving for better together.

We have an agile, innovative and test and learn organizational culture, underpinned by our four pillars of communication, equality, recognition and fun, and our philosophy that people who like what they do, do it better.

We are a leading FTSE100 Financial Services company with businesses in the UK, Europe and America. We set up in 1993 as a car insurance specialist, but since then we have expanded into other countries and other services such as price comparison, home and travel insurance, Insurtech, personal loans, car finance and legal services.

Our history is one of growth, profitability, and innovation. When we launched in 1993, we had just one brand, zero customers and 57 members of staff. We now have over 11,000 colleagues and 7 million customers worldwide.

We are proud to have our headquarters and UK offices in south Wales as well as businesses in Spain, Italy, France and the US. We also have offices in Halifax, Canada and Gurgaon, India. Our Gurgaon operation, Admiral India is the state of art technology excellence center that is committed to digitally empowering a global network of Insurance brands within Admiral Group.

During the early 2000's, we created Confused.com, the UK's first price comparison website and in 2017 we launched Admiral Financial Services. Admiral Financial Services utilizes the learning gained from the Group's experience within the insurance sector and has a focus on data analytics, technology, customer centricity and product innovation. More recently, we launched new Insurtech propositions, such as Veygo and Homebrella, also set up Admiral Pioneer tasked with exploring and investing in new ventures and emerging consumer needs.

Qualifications

Bachelor's degree required or equivalent experience

Mandatory Skills

- Experience working in GCP (Big Query, Data Flow, Cloud Functions)
- Experience working with Big Data, preferably in the field of insurance.
- Experience with Data Pipelines and ETL processes.
- A genuine interest in Data and Analytics and driving forward our capability in the field.
- We are looking for an experienced data engineer or data analysts looking to take the next step their career into the world of technology and data to help us start building out our data pipelines and reports.
- We work in an agile fashion and are looking for someone who can work independently as well as part of a diverse team whilst delivering to agreed timelines in a fast-paced and changing environment. Training will be offered on any new technologies or area.

Responsibilities

- You will be part of a multi-disciplined team building a cloud data platform, spanning better data and better tooling. Across the tribe you may get involved in:
- Developing an in-depth understanding of our Pricing and Analytics departments enabling you to identify areas and opportunities for development and efficiencies.
- Becoming an effective point of contact for other departments to discuss business problems and potential solutions.
- Assisting in training and onboarding new users to the tool set and managing the change created by a new way of working.
- Maintaining existing ETL processes from our existing data sources.
- Developing new ETL processes for both internal and external data sources.
- Reconciling our data in the cloud back to source systems and develop tools and code to make the process more efficient.
- Finding value within our platform, be that different tooling methods, improvements to ETL
- pipeline or improve processes.
